<sup>a</sup>A map is not included for the District of Columbia since the convention does not include any associational structure.

## Preface

This present volume updates the 1982 atlas of associational boundaries. The latest changes were provided by state convention directors of missions. Without the interest and help of state convention leadership, the continued production of this useful resource material would not be possible.

The task of marking the maps was handled by graphics technician, Vicki Mitchell; proofing and production services were performed by Susie Acree, secretary/librarian of the Program Research Department.

The original atlas was compiled ten years ago to help Home Mission Board staff analyze population trends at the associational level. The maps continue to be a resource for planning and data gathering and they are now made available to planners outside the Home Mission Board.

Associational boundaries are not strict lines of demarcation. Many, if not most, Baptist associations have one or more churches located just outside their "official" territory. While boundaries may be somewhat fluid (or ambiguous as in New York), the borders defined in this atlas provide an adequate definition for studying population statistics.

A companion volume to the atlas is the Director of Associational Missions Directory that identifies directors of missions by association and mailing address. This piece is available from Orders Processing, Home Mission Board, 1350 Spring Street NW, Atlanta, Georgia 30367.

As you become aware of changes in associational boundaries, please notify the Program Research Department of the Home Mission Board. Thank you for helping us keep our records up-to-date.
