***Distributions of Southern Baptist Churches
Based on Annual Church Profile and
Uniform Church Letter Data, 1972-1995***

Phillip B. Jones
December 1996

Foreword

This document is a detailed appendix for the companion report *A Large Convention of Small Churches: Analysis of the Distributions of Southern Baptist Churches*, and contains every 10th percentile for variables taken from the Annual Church Profile or its predecessor (the Uniform Church Letter) for every year from 1972 through 1995. Each year's data is included in a separate table.

Over the past couple of years there have been some changes in the data collection process for Southern Baptists. Beginning in 1994, the annual collection of data from churches became known as the Annual Church Profile. Prior to 1994 it was referred to as the Uniform Church Letter. There are some inconsistencies in the data that are attributable to change in the collection process. In most instances the items are directly comparable; in a few instances some items have been changed significantly. For precise definitions, refer to the historical set of guidebooks/worksheets that have accompanied the annual questionnaires used to survey Southern Baptist churches.

While it is possible to examine changes in the distribution of a particular variable over a 24 year time span, caution should be exercised since the data are snapshots of the entire distribution of churches and not changes in individual churches. The text in the companion report deals with some of the problems of interpretation of the data.

A number of people have contributed significantly to the development of this report. Paulette Villarreal and Julie McKelvy spent many hours at a computer deriving the percentiles found in the tables. Both Marilyn Kelly and Connie Anthony typed the tables. Marilyn Kelly edited and styled the tables.
