Dr. R. J. Willingham,

Richmond, Va.

Dear Brother:--

I want to make a flying trip to Missouri in March, if I can get off, too see my father and mother. I have not seen them for over four years, and they are getting old. Of course, I will not go unless I can leave the plant running smoothly, but I think I can with Bro. Benson's help get off for about two or three weeks without any harm being done to the work. Of course, also, with the permission of the Brethren of the Board. My wife will not go now.

We will have the very best report ever. I am getting it up now to send you in a very short time. It is hard to get down to business, as there are so many things I have to look after. But will have it ready in a few days. You will see what I think will please you. I do not boast, but I do think it has been providential that we could stick to our bush during these years of war, and by careful buying and keeping our credit good, we have been able to make this report.

A young man is coming to help me beginning the 1st of Feb. I am on the look out for a man to take the oversight in the plant proper. I will then be in better shape to take a little better care of myself.

What do you think of my letter head? Fraternally,

J. E. Davis
