Dear Brother:-

Trains bearing our letters crossed on the way. I believe Providence is in this matter. The letter you enclosed gives me additional and larger visions which I rejoice in. It seems clear that your Board has an easy opportunity of dominating the Continent of Europe and so shaping its Theology. The first name that jumped into my mind for the proposed Seminary at Brunn was Prince Burrows and then came Carver and others. The writer of this letter should be there to break in the constituency on Sunday School matters. She could do it and would rejoice in it. The Training School for young women would come later and she could go there and break them in also. With an American at Brunn the Foreign Board could easily take over Moravia and Bohemia and so Southern Baptists would have the whole heart of the situation.

Blessings upon the writer of the letter enclosed and may a double portion of the Spirit be upon you in this hour of immense possibilities. I will talk the whole matter over with Dr. Sampey.

Sincerely yours,

JNP/NJW.
