

WESTERN RECORDER.

A. G. CAPERTON, EDITOR AND PROPRIETOR. OFFICIAL CORRESPONDENTS: J. C. BURKHOLDER, J. M. PHELPS, J. A. C. CANTON, REV. L. R. FOSTER.

LOUISVILLE: THURSDAY, JUNE 9, 1881.

When writing to any one advertising in this paper, please state that you saw the advertisement in the Western Recorder.

Child Culture.

In the Northern Baptist Anniversaries, recently closed, there were some good strong things said upon the proper training of the children. We are glad to notice, also, that Dr. Henson has a favorable article in the June number of the Baptist Teacher upon the same subject. This subject is one of deep interest, not only to parents, but to the nation at large.

Are we to have William?

It looks like it. It is but a few days since representatives of the "order" to the number of about twenty-five, from Europe and this country, met in the city of Chicago evidently for the purpose of laying plans for the growth and advancement of their own ideas on this Western continent.

pleasure and—of oripa. Many of the criminals in our land are more to be pitied than blamed. Visit our jails and penitentiaries, and in the face of many a man who wears the criminal's uniform, the nobler attributes of humanity shine.

Responsibilities of the Hour.

Our Baptist Anniversaries, North and South, are over. Grand, stirring addresses were delivered; strong, wholesome resolutions adopted. No one who enjoyed those meetings but vowed that they would do more during the coming year for the evangelization of the world.

A TRIP TO MISSISSIPPI. III.—OLD MIDDLETON. The building of railroads, like the movements of time, makes many changes in the condition of a country.

Will and the New Revision.

Much of merry-making has been indulged in by men of the Ingworth stamp over the assumption that the revisioners have "knocked hell out of the Bible." As to the truth of the assumption, we leave readers of the Revision to judge.

organization in the various governments herein named; and that to compass the death of these several ministers of state, and of those who may succeed them, is the primary principle and work of our order."

Thus we have a reaffirmation of what we have learned from other sources before, that the end and object for which this organization has been called into existence, is to strike down all recognized heads of government and elevate the sovereignty of the people.

AN OLD SAW.

A few little words make slipping out. In the glad new day with a merry shout...

Harvest Home.—XVII.

BY JESSIE.

"Perhaps in some lone twilight hour, Like those we have known of old...

Judge and Mrs. Stanley made a hurried visit to the Oaks, on the occasion of Emile's return.

Hartly had avoided Lucy since the conversation on the gallery, which had left it in his life forever.

"I can not do that—any who loved her—if she were anything else but what she is."

Hartly, drop that bitter tone, so unlike yourself, and tell me how you came to do this—

"Are you acting from revenge? Can you justify that to yourself?"

"You mistake me, Lucy; I wander very sadly, very frequently give way to bitter thoughts."

"I do not wonder, for you are an Christian, so are those bitter words, but my only hope and trust is in that bright Exemplar."

"I devoted myself to Christine with my usual thoughtlessness."

"It seemed that Madam Woe wished me to discontinue my visits, as I had driven other lovers away."

"I walked straight into the snare—generous, unsuspecting Hartly."

"Don't pity me, Lucy; anything but that. Give me your sympathy, the friendship I was too self-willed to take when you offered it."

"I remember (God grant it aces) the French saying, 'There may be a great deal of love after marriage, though there be none before it.'"

"The Errendorf hurried on the wedding under various pretexts."

"Mr. and Mrs. Stanley must by all means be present. It could take place sooner if by that arrangement they could stay."

"The Atlantic storms would soon set in. Christine must not run the risk of one, she had been nearly frightened to death when at sea before. Dear Helen, has a stronger nerve."

"For every splendid act of heroism done on the battlefield, a hundred are done in shops and quarries, and in the storm-tossed ocean."

"There's a man a life 'Twist the cup and the lip."

"They need not have feared Hartly Montmarie's truth and honor."

"As may be supposed, the wedding was to be a quiet one. Clara Stanley, in point lace and diamonds, looked queenly, and her distinguished husband seemed very proud of her."

"When the old house was left all most deserted, Mr. Montmarie seemed lonely."

"Lucy," he said, abruptly, "I shall never leave me, I have decided on that. This breaking up of families is uncomfortable. I shall marry you to each other and so prevent somebody else from stealing a march on me."

"Blushing in every frown was very sober now—not flattering to Christine—for he was an accepted, and whatever his mood, a most acceptable lover."

"Helen only could win the old smile back occasionally, and they were not so chary then as the old ones. It was touching to see how old he followed her up."

"For her sake, more than Christine's, he would be Fred, and their old confidence was restored. Mr. Montmarie gave a reluctant consent to the double marriage. Emile was too late to prevent it."

"No, no, Lucy, that is not business-like, and I am a business man. Tell me, for I have been longing to know what separated you and Hartly?"

"I am not proud, only grateful—too grateful to your family to—"

She was so honest in her objections to him as to Hartly; but he took quiet possession of her.

"You shall not sacrifice yourself and me to an idea. There is in your nature a stony necessity for loving."

"I could, Emile—I verily believe I could; but I am so glad not to try."

[To be continued.]

THE HEROES.

Brave deeds are in shops and forges. A few days ago, in the American Iron Works at Pittsburgh, an iron-roller named Robert Moore, had a white-hot ring of iron thrown by accident over his head and down on his shoulders.

"With wonderful nerve, he took hold with a pair of tongs of a piece of iron protruding from one side of the fiery circle, and seized the other side of the ring with his naked hand."

"The ring was a pretty tight fit, there not being quite an inch and a half to spare as it passed over his nose. The man had the fortitude to lift the hot iron slowly and carefully over his head without touching any part of it. His face was badly scorched, and his hand was burnt to the bone; but he never flinched. When the iron band was cold, he put it back on his neck, and then his head."

"Some years ago, a German laborer in the Fort Pitt cannon foundry had some molten iron poured accidentally into one of his shoes. He was carrying at the time one side of a vessel filled with liquid iron. If he had dropped it, he would have endangered the lives of his comrades and set fire to the building. If he had set it down, he would have spoiled the casting of a gun weighing one hundred and thirty tons. The man walked steadily to the pit into which the molten iron was to be poured, and did not let go the handle of the vessel until his duty was done. He had that molten iron in his shoes about one minute and a half. It did not take him as long to get his shoe off, but who can imagine the torture and the length of time of that minute and a half?"

"A fine young fellow in the same smoky city of Pittsburgh had his hair terribly lacinated by the machine he was in charge of. He felt that he was about to faint, and had only strength to say one thing to the foreman who caught him in his arms."

"Don't let anything be said of this to my wife."

"For every splendid act of heroism done on the battlefield, a hundred are done in shops and quarries, and in the storm-tossed ocean.—York's Companion.

Unoccupied Rooms.

Many people leave their houses for the summer, during which period not only the furniture, but also the walls, and the paper on them, are liable to get damaged by the moisture in the atmosphere. This can be avoided in a simple manner. Before leaving the house the rooms containing furniture ought to be well-furnished up, to exclude as much of the odor air as possible. A dish of dry chloride of lime should then be placed in the middle of the apartment, and inside of another large empty vessel, intended to receive the water flowing out of the former. The well-dried chloride of lime has such an affinity for water that it will attract all the moisture contained in the room and keep the air perfectly dry, so that no harm can occur to either furniture, books or papers.

Our Little Folks.

MATHIE'S PLEA.

"Write it not down, dear Lord, this time. Let little Mattie tell, just this once, 'God's will the best and best of things. In that wonderful beautiful book of thine, Mamma says babies recite rhyme. And dear mother of this book is ever wise: 'I'm nearly a baby, or am I not?' But still, I've been doing what was right. But I didn't know 'twould be so wrong. The Sunday nurse or I want to pray. To me my little is pretty much gone. And I'll not repeat it on the dear Lord's day. So I thought I'd beg you to write it not down. For I don't want him and discord to be selling the page and breaking the rhyme. In the record you are filling up for me."

"Plead on, sweet one, thy little voice Will surely touch the Savior's heart; Ah, read that sweetest little rhyme. Remember, nearest, at thou art!"

Hessman, S. C. —Linn, in Harper's Courier.

A friend loveth at all times, and a brother is born for adversity.

"I'm Not Proud."

Mamma and the children, Harry and Sarah, were in the garden when "Auntie" slipped in mamma's room and took "Rose" from it to her own room, where she shut herself up and would not open the door all morning, although the children called her "over so many times" as Harry said in "astonishment to Sarah, who declared "it was very funny, for Auntie always opened the door when they called."

"They talked it all over with mamma, who could give no explanation of this strange conduct on the part of Auntie, and not one of them missed "Rose," who was Sarah's "most beautiful" was dollie, as both the children called her, which grandma had given Sarah on Christmas a year ago. But when the dinner bell rang "Auntie" came out of her room looking very smiling, and the children both rushed up to her exclaiming: "O Auntie what have you been doing all the morning, that you did not open your door when we called?" "So busy 'till one o'clock," was all Auntie said; but when dinner was over she said to them, "Now I will show you what I have been doing all the morning," and she held out Rose to Sarah, who took it in her little hands and looked her all certain perfect amazement at the velvet and satin dress, lace collar and kerchief, and beautiful sash, and when she had quite made up her mind that this "was really her own, her very own dollie," she looked up at mamma and Auntie, and said with a deep sigh: "Well, I'm not proud, O, no! not at all proud, but dollie's dollie is very proud!"—Evening.

Beautiful Incident.

On board the ill-fated steamer, Savannah, was one of the Irish University singers. Before leaving the steamer and committing himself to the merciless waves, he carefully fastened upon himself and wife life preservers. Some one cruelly dragged away that of his wife, leaving her without hope except that she could cling to her husband. This she did, placing her hands firmly upon his shoulders, and resting there until her strength becoming exhausted, she said, "I can hold no longer."

"Try a little longer," was the response of the wearied and agonized husband; "let us sing, 'Rock of Ages.'" And as the sweet strains floated out over the troubled waters, reaching the ears of the sinking and dying, little did they know those sweet singers of Israel, whom they comforted. But lo! as they sang, one after another of the exhausted ones were seen raising their heads above the overwhelming waves, joining with a last effort in this sweet, dying, pleading prayer.

With the song seemed to come strength, another and another were encouraged to renewed efforts. Soon in the distance was seen a boat approaching. Could they hold out a little longer? Singing, still they cried and sang, with superhuman strength, they laid hold of the life-boat, and upon it were borne safe to land. This is no fiction, and it was related by the singer himself, who said: "be believed Toplady's sweet 'Rock of Ages' saved many another besides himself and wife."—Selected.

Definition.

Tonyson can take a worthless sheet of paper and by writing a poem on it make it worth \$5,000. That's genius. Mr. Vanderbilt can write fewer words on a similar sheet and make it worth \$50,000,000. That's capital. And the United States government can take an ounce and a quarter of gold, and stamp upon it an eagle bird, and "I've upon it the word," "The money." The mechanism take the material worth \$3 and make it into a watch worth \$3 and make it into a watch worth \$100. That's skill. The merchant can take an article worth twenty cents and sell it to you for \$1. That's business. A lady can buy a comfortable bonnet for \$10, but prefers to pay \$200 for one because it is more stylish. That's foolishness. The ditch digger works ten hours a day, and shovels out three or four tons of earth for \$1. That's labor.

A Golden Rule for Avoiding Sin.

"Be thou in the fear of the Lord all the day long."

When you think, when you speak, when you do, when you walk, when you seek for delight. To be true from all evil, at home and abroad. Live above, as under "the eye of the Lord."

CARPETS, &c. LARGEST SALE OF THE SEASON! TO COMMENCE MONDAY MORNING, APRIL 25, OF DRY GOODS AND CARPETS.

Body Brussels Carpets, Imperial Three-ply Carpets, Tapestry Brussels Carpets, Extra Super Two-ply Carpets, Single and Double-chain Carpets, Oil-cloths, Cocco and Napier Matting.

Orders by mail promptly filled. Remember our address, DICKINSON FURNITURE MANUFACTURING CO., Nos 78 and 80 Sixth Street, and Main Street, bet. Fifth and Sixth Streets, Louisville.

Woodstock and Farm.

KENTUCKY ITEMS.

The barley crop is heading off finely. The Kentucky wheat is heading out rather well.

There will be 1,500 acres of tobacco grown in Kentucky this year.

The tobacco crop of Pendleton county will be the largest since 1870.

Most beef cattle are still in Bourbon county and bringing \$1.45 to \$1.60 cents.

The plum crop for which is gradually becoming more discouraging.—Demoss Advertiser.

Logan county has the prospect of the largest yield of blackberries for years.

The Advertiser says the field is making and herve with the wheat fields in Boyle.

A good, second article of old corn is now worth 38 per barrel delivered in Daviess.

John G. Lockman of 20 sheep killed by dogs one night last week and several others badly injured.—Clark Co. Democrat.

Some sales of the growing crop of wheat in Fayette have been made at 20 cents.

The demand for short-horn is keeping pace with that for thoroughbreds.

A full meeting of the Woodford wool-growers will be held in Vermilion on the fourth Monday of this month.

No much tobacco is going into Paducah that the warehouses, though very extensive, are unable to accommodate the influx.

Geo. Egan, of Bell, sold a nice bunch of work males at \$150 per head last week to the Big Spring contractor.

The Lexington Chronicle thinks hemp will continue to advance, but says the growers must exercise their own judgment about selling.

An Atlanta firm has placed an order with J. W. Baly, of Jessamine, for the product to the value of 100,000 bushels of wheat.

The corn crop in this section is later and more backward than it has been for many years, but with reasonable care a fine crop will be made.—Clark Co. Democrat.

Mr. William G. Dearen has sold his Green river farm of 800 acres of bottom, and 400 acres of hill land, in Taylor county for \$1,000 cash to an Atlanta firm.

Monongahy county farmers will call to their old turkeys to assist them in warning their tobacco. The turkeys not only pick the worms, but gobble them down as a delicacy.

The wool market remains unchanged since prices have prevailed since the opening of the season, 1891. The clip of Boyle county is about 100,000 lbs and more than three-fourths of it has been sold at this price.—Demoss Advertiser.

The small grain is heading out very low but it is not thought to have been seriously injured by the drought except on very thin soil and the prospect for an average yield is still good.—Clark Co. Democrat.

One of our best farmers says that timothy hay is the most profitable crop that can be raised by those who live near a railroad. It should be cut as soon as the first green heads can be observed in the field.

Farmers are better prepared to meet the drought of 1891 with their tobacco crops than in any previous year. The plants are ready for transplanting as soon as it rains.—Demoss Advertiser.

Experiments made in Henry county this spring prove conclusively that tobacco plants grown in beds covered with this cotton will be ready for transplanting from two weeks to a month earlier than those in beds treated in any other way.

The Glasgow Times says that corn at sixty cents per bushel is more remunerative than tobacco at three or four dollars per hundred, and adds, "the farmer who turns his thought to raising corn now as a means of enriching his pocket."

Since our last report there have been a few light showers in this section, but the general drought continues to the great detriment of the growing crop and grain.

We have good rains within a few days many of the Daviess farmers will prove entire failures.—Demoss Advertiser.

It is said that Abe Benick has refused \$300,000 for the Rose of Sharon herd of Short-horns, numbering about 100 head. The choicest herd of those of 1800 in the world is that owned by Messrs. Van Meter & Hamilton. What must it be worth.—Lexington Press.

The blue grass seed crop will be a good one, and local prices will be thought open up to 20c from the stripper for similar lots and 30c in larger quantities. Paris reports are reported as offering one cent better, but this is not certain.—Clark Co. Democrat.

GENERAL ITEMS.

Locusts are appearing in vast numbers in portions of Arkansas.

Farmers in East Tennessee complain of rust in their wheat.

What harvest has commenced in Southern Georgia.

Thousands of Wisconsin fruit trees have been destroyed this year by ground mice.

Six hundred tons of bananas, that is about 10,000,000 bananas, arrived in New York city in a single day.

Plans for a new state capital building of Texas have been accepted. The building is to cost five million dollars.

Ex-Congressman Loring, of Massachusetts, has been appointed Commissioner of Agriculture in place of Mr. Le Deo.

It is believed that the partial revenues for the present year will exceed \$30,000,000, which will be about \$4,000,000 more than the estimate made at this time ago.

The Atlanta, Ga., rolling-mill has paid out in seven months for material and in payroll, \$3,000,000. The mill now has an order for 3,000 tons of rails, at \$48 per ton.

The production of cotton per acre in the States in North Carolina is the largest in the State in the South. Georgia is next in the scale of production.

A liberal quantity of some kind of mulch should be provided for young fruit trees whose roots are exposed to the full rays of the summer sun.

The Legislature of Wisconsin has appropriated \$4,000 to enable the managers of the State experimental farm to make experiments in the production of sugar from amber cane.

They frequently stop the cultivation of crops too soon and allow the weeds to gain possession of the soil. Cultivate early and often should be the rule for corn.

Tomato plants may be protected from the rust worm by sowing about each plant a couple inches of red clover seed.

The clover will grow up and keep the rust worms off the plants, and also keep it at a distance.

A garden should not be shaded by large trees. There are few vegetables or flowers which flourish under a large tree, and the strong roots of the tree usurp all the soil.

The white grub is one of the worst enemies of the strawberry plant, as it does its destructive work underground. It eats the roots, and is taken from discovery only the last few days of the season.

Fruit-growers who have the moral courage to remove a third or more of the fruit that "sets" on their trees will be rewarded by fruit more and more of it, in bulk if not in number, than those who are less fortunate.

A liberal dressing of wood ashes will remove a stinging orchard most wonderfully. Bone dust and crushed oyster shells can also be applied and beneficial results will soon be apparent.

A. B. Goodell advises in the Weekly Tribune that the best seed should be put around the current bushes in May and June. He did so, he says, twice a week, and had no trouble from ground-squirrels, while other farmers who sowed their bushes 150 feet distant had no success.

Credo unarmamentum manu et muchi mousure tendit to produce a soft rapid growth in young from that continue late in the season, thus rendering them liable to injury from severe frosts.

A farmer has been raising cane upon the best soil for eight or ten successive years, and every year he has succeeded in obtaining a better quality of syrup and about as much as the same amount of land in any other year.

It is reported that the largest hog in the country is a Poland-China, weighing 1,650 pounds.

SINCE 1861 the grain crops of the United States have been valued at the enormous sum of \$1,000,000,000, or an average of \$1,000,000,000 per annum.

Of this total, about one-half, or \$500,000,000, has been raised in the United States since the first crop during the same period has aggregated a value of \$3,000,000,000.

In the year 1880 the United States exported 145,499,000 lbs of wheat, valued at \$171,420,100; and 1,128,154 barrels flour, invoiced at \$2,913,947.

TO CURE FOOT ROT IN SHEEP.—The preparation of the foot is as essential as the remedy, for if any part of the disease is not laid bare, the remedy will not effect a cure.

A solution of this virus as strong as strong, after the foot has been washed for a moment, having the liquid three or four inches deep, or deep enough to cover the affected part, then hold the diseased foot in this liquid ten minutes, or long enough to penetrate to all the diseased parts, put the sheep on a dry bare floor for twenty hours to give it a chance to take effect.

In everyone who has tried it, it is effected a cure, and I have never given a sheep medicine internally for foot rot. This is the best cure that I know of the foot is thoroughly prepared, for a more expeditious cure, and where you don't hardly hope to exterminate the disease, but keep it as a subject, in this after preparing the foot as above, rub the virus with a cotton-wool, pour oil of vitriol into it slowly until the heating and boiling process ceases, and apply with a swab.

This remedy works quicker, is stronger than the vitriol, and is so safe, but its mode of application requires its use now.—Ohio Farmer.

The Paris Kenrick says: Those who have waited until summer should watch the market. Waiting to timber of freight on the lumber has suddenly run short. Those who have waited long should get them upon the market as soon as possible, and they may feel confident upon realizing a handsome price.

Wanting lumber is a high price, and it is now coming in a big crop from furniture manufacturers. We frequently see loads of walnut logs passing through our city to saw mills in this country to be cut into boards and shipped to furniture manufacturers in Cincinnati and other cities.

Common sense in the lumbering trade of the genus Juglans are rapidly disappearing from the woods in Bourbon and adjoining counties.

CLARK COUNTY SHORTHORN.—Clark county contains more shorthorn cattle than any other county in this country or England.

The citizens here that countenance a peculiar pride in cultivating the breeding of the pure blood stock. Messrs. Van Meter & Hamilton have a herd which contains more than 700 head.

Abe Benick, has a herd amounting to 100 head of the Rose of Sharon breed, which he has refused an offer of \$200,000. Many other citizens in the county have herds numbering from 50 to 90 and 100.—Commercial.

DANGER OF CANNED FRUITS.—The explosion of fruit cans is not a casual consequence against the health of the human family.

Some sharp men once found out that it was economical in the manufacture of tin-plate to introduce into it a small quantity of lead, and now the cheaper grades of tin are adulterated in this way.

The discovery is fraught with mischief, for when acid fruits come in contact with this mixture of tin and lead, they are liable to become contaminated and produce lead poisoning.

It is in this country is now carried on to a much greater extent than ever, and causes a large number of injuries due to shuffles or individuals by eating fruit which has been contaminated with lead.

It is in this country is now carried on to a much greater extent than ever, and causes a large number of injuries due to shuffles or individuals by eating fruit which has been contaminated with lead.
