PREFACE

The Southern Baptist Periodical Index - 1980 is a continuation of the project initiated in 1965 at the request of the Southern Baptist Inter-Agency Council for compiling a comprehensive index to articles appearing in the periodicals published by the agencies of the Southern Baptist Convention. The same plan has been followed in this edition as in previous volumes, i.e., each agency has indexed its own periodicals, and the Historical Commission has served as coordinator of the joint project.

Fifteen agencies of the Southern Baptist Convention plus the Association of Baptist Professors of Religion have cooperated in this project to produce a comprehensive author and subject index to the 1980 issues of forty-nine periodicals. The names of the periodicals and the publishers are listed on the following pages. A bibliography of Baptist-related articles appearing in the 1979 issues of non-agency periodicals has been compiled and published in the October, 1980, issue of Baptist History and Heritage.

The 1980 edition of the Southern Baptist Periodical Index is another major product of the Baptist Information Retrieval System (BIRS). BIRS is a centralized computer system developed by the Historical Commission, SBC, with the assistance of several other Baptist agencies and institutions. Designed to provide reference information on a myriad of subject areas of concern to Baptists, BIRS is one of the most significant and far reaching ventures ever undertaken by the history agency of Southern Baptists. Already the project has resulted in the development of a Thesaurus (authority list of subject headings for indexing)--revised edition, 1978, the standardization and coordination of procedures for indexing materials, the development of a BIRS data base containing more than 317,000 data entries from about 60 Baptist periodicals, newspapers, and other sources, and a retrieval program capable of retrieving data from the system by specific subject or person's name as the primary search field. Inquirers can narrow their search by adding to the primary search field one or more of the following delimiters: source document, publication date, author, media type, data originator, geographical area, and chronological period.

By the end of 1981 the BIRS data base should contain a minimum of 367,000 subject and author entries from more than 80 different sources including such media types as manuscript collections, vertical files, annuals of associations and conventions, research reports, and photographs, as well as periodicals, newspapers, and other materials.

Primarily a bibliographic reference system, BIRS will direct users to specific articles, records, manuscripts, or other documents containing data by authors or on subjects in which the inquirer is interested. The broad availability of massive reference data through such a system can save countless hours of research time, eliminate much duplication of research effort, and provide coverage of much greater depth and breadth than is now possible. Students, educators, writers, pastors, denominational workers, and others desiring background and contemporary information on Baptists may submit queries to the Historical Commission and secure reference information in a short time.

All inquiries for information from BIRS on specific subjects or persons should be sent to the Historical Commission, SBC, 127 9th Avenue, North, Nashville, Tennessee 37234. Responses to search requests will be made in the form of computer printouts of bibliographical reference data from sources included in BIRS. The Commission will welcome your search requests. A modest fee will be charged for obtaining data from BIRS.

BIRS prepared camera-ready copy in a cap and lower case format for the Southern Baptist Periodical Index - 1980 thus eliminating the long, tedious task of manually compiling data, filing cards, and typing the manuscript for this annual publication. This edition of the Index represents a pioneering and innovative approach to the indexing of Baptist periodical literature. As evidenced in the production of the current Index, BIRS has every possibility of greatly altering and facilitating research into subjects relating to Baptists.

Every effort has been made to produce an Index with a minimum of errors, but it is impossible to avoid some inaccuracies in a project of this dimension. The accuracy of the indexers has been relied upon for the correct notation of bibliographic details.

Appreciation is expressed to the editors of the cooperating periodicals for their assistance and to their staff members who indexed the periodicals. The reception accorded the fifteen previous volumes of the Index has been an encouragement to all who have had a part in producing this sixteenth volume. It is hoped that there will be a growing appreciation for this reference tool.

USING THE INDEX

ARRANGEMENT

Authors and subjects, including names of persons used as subjects, are arranged in one alphabet. Title entries are not included in the main alphabetical arrangement but appear only as sub-entries under subject and author entries.

Each entry contains six elements in the following sequence: title, author(s) (if any), periodical, volume, page, and publication date.

When a picture, rather than an article has been indexed, the word "photograph" appears in the entry prior to the title.

Each page reference is to the initial page of an article.

CROSS REFERENCES

"See" references direct the user from various forms of entries to the main entry. The index also includes "see also" references to related subjects under which additional material may be found. There are no cross references to names of countries when entered as direct entries or as subheads under the main heading "MISSIONS, GEOGRAPHICAL." Missions-oriented articles about countries are under this latter heading. Other types of articles about countries appear under the names of countries when these names are direct entries.
