PREFACE

The Southern Baptist Periodical Index - 1984 is a continuation of the project initiated in 1965 at the request of the Southern Baptist Inter-Agency Council for compiling a comprehensive index to articles appearing in the periodicals published by the agencies of the Southern Baptist Convention and of its auxiliary, Woman's Missionary Union. The same plan has been followed in this edition as in previous volumes, i.e., each organization has indexed its own periodicals, and the Historical Commission has served as coordinator of the joint project.

Fourteen agencies of the Southern Baptist Convention and the auxiliary Woman's Missionary Union have cooperated in this project to produce a comprehensive author and subject index to the 1984 issues of forty-seven periodicals. The names of the periodicals and the publishers are listed on pages iv-v.

The 1984 edition of the Southern Baptist Periodical Index is the last major product of the Baptist Information Retrieval System (BIRS). A centralized computer system designed to provide reference information on a myriad of subject areas of concern to Baptists, BIRS was developed in the early 1970's by the Historical Commission, SBC, with the assistance of several other Baptist agencies and institutions. BIRS resulted in the development of a Thesaurus--authority list of subject headings for indexing--revised edition, 1978; the standardization and coordination of procedures for indexing materials; the development of a BIRS data base containing more than 573,500 data entries from about 60 Baptist periodicals, newspapers, and other sources; and a retrieval program capable of retrieving data from the system by specific subject or person's name as subject.

At its October 21-22, 1984, meeting, the Historical Commission's Administrative Committee voted to discontinue the ongoing operation of BIRS. Primary reasons included the inability of the vendor to continue providing computer services and the cost factors involved in transferring BIRS to another vendor. The cessation of BIRS also means the discontinuation of the publication of the Southern Baptist Periodical Index after the present volume. BIRS has provided camera-ready copy of the Index since the 1974 edition.

SPECIAL NOTE: Previous volumes of the Southern Baptist Periodical Index are still available for each of the following years: 1967-68 and 1970-83. The cost for each volume is $32.95 (including postage and handling).

Primarily a bibliographic reference system, BIRS prepared camera-ready copy in a cap-and-lower-case format for the Southern Baptist Periodical Index - 1984, thus eliminating the long, tedious task of manually compiling data, filing cards, and typing the manuscript for this annual publication. This edition of the Index and the past ten editions have represented a pioneering and innovative approach to the indexing of Baptist periodical literature. As evidenced in the production of the current Index, BIRS has facilitated research into subjects relating to Baptists.

Every effort has been made to produce an Index with a minimum of errors, but it is impossible to avoid some inaccuracies in a project of this dimension. The accuracy of the indexers has been relied upon for the correct notation of bibliographic details.

Appreciation is expressed to the editors of the cooperating periodicals for their assistance and to their staff members who indexed the periodicals. The reception accorded the nineteen previous volumes of the Index has been an encouragement to all who have had a part in producing this twentieth volume.

USING THE INDEX

ARRANGEMENT

Authors and subjects, including names of persons used as subjects, are arranged in one alphabet. Title entries are not included in the main alphabetical arrangement but appear only as sub-entries under subject and author entries.

Each entry contains six elements in the following sequence: title, author(s) (if any), periodical, volume, page, and publication date.

When a picture, rather than an article has been indexed, the word "photograph" appears in the entry prior to the title.

Each page reference is to the initial page of an article.

CROSS REFERENCES

"See" references direct the user from various forms of entries to the main entry. The index also includes "see also" references to related subjects under which additional material may be found. There are no cross references to names of countries when entered as direct entries or as subheads under the main heading "MISSIONS, GEOGRAPHICAL." Missions-oriented articles about countries are under this latter heading. Other types of articles about countries appear under the names of countries when these names are direct entries.
